

Victor Kipngetich Yegon

Software Engineer

+254 759213531
victoryyegon222@gmail.com

Skills

Programming & Development

Application development, web development, cross-platform solutions, responsive design.

Python, JavaScript, Flutter, Dart, Tailwind CSS, React, Node.js, React Native

Databases

Database design, data management, real-time data synchronization, backend integration.

MongoDB, MySQL, Firebase, SQL

Cloud & DevOps

Cloud infrastructure, deployment, version control, containerization basics.

AWS Cloud Computing, Git, GitHub, Docker (basic), CI/CD concepts

AI/ML & Security

Machine learning fundamentals, AI application tools, cybersecurity awareness, data protection.

scikit-learn (basic), cybersecurity principles, AI tools, TensorFlow(basic)

Design & UI/UX

User interface design, user experience, prototyping, branding, visual communication.

Figma, Adobe Creative Suite (Photoshop, Illustrator), Graphic Design, UI/UX Principles

Soft Skills

Collaborative development, client communication, analytical thinking, adaptability, leadership.

Team Collaboration, Communication, Problem-Solving, Adaptability, Time Management, Leadership

Profiles

Kipngetich222

victor-yegoo

Software engineer with 2+ years of experience in software development, web design, and system maintenance. Passionate about leveraging technology to solve real-world problems and inspiring the next generation in tech. Seeking a role to contribute to technology projects and innovations in the Tech Space.

Experience

County Government of Bomet – Department of Finance, ICT & Economic Planning May 2024 – Aug 2024 Bomet, Kenya

Industrial Attachment – ICT Support

https://bomet.go.ke/

- Provided ICT user support and troubleshooting for hardware/software issues.
- Managed web maintenance, software installations (Windows OS, patches, antivirus), and network configuration.
- Performed data entry, data recovery, and system updates.

Freelance Software & Web Developer 2024 – 2025 Remote

- Developed custom software solutions and responsive websites for clients.
- Designed logos, brochures, and UI/UX mockups using Figma, Adobe tools, and Canva.
- Built and maintained web applications using Flutter, Firebase, and MongoDB.

The African Centre for Women, ICT (ACWICT)– Contract Sep 2023 – Mar 2024 Kisii, Kenya

Training of Trainers (TOT)

https://acwict.org/

- Empower farmers, particularly women and youth, through scalable and accessible digital agricultural services.
- Access and engaged farmers in rural parts of the country.
- Trained Farmers on digital literacy

Google Developer Student Club - Kisii University 2023 – 2025 Kisii, Kenya

Core Team, Organizer & Graphic Design Lead

https://gdg.community.dev/gdg-on-campus-kisii-university-kisii-ke...

- Organized tech workshops and events to promote innovation and digital literacy.
- Led graphic design initiatives for club events and promotional materials.

Kisii University Computing Students Association - Kisii University 2022 - 2025 Kisii, Kenya

Core Team Member

- Engaged in Coding Workshops & Bootcamps
- Collaborated in hackathons and coding challenges
- Attended and contributed to tech talks, seminars, and industry sessions
- Developed teamwork, problem-solving, and technical communication skills

Certifications

Computer Science

Kisii University
2025

AWS re/Start – Cloud

Computing

Amazon
2025

Ajira Digital – Graphic Design

Ministry of ICT
2024

Languages

English

Proficient

Kiswahili

Proficient

Education

Kisii University

B.Sc. in Computer Science
<https://kisiiversity.ac.ke/>

Sep 2021 - Dec 2025

Tertiary

Longisa Boys High School

High School Studies

Jan 2017 – Dec 2020

Kenya Certificate of Secondary Education

Projects

Teacher-Parent Core-Teaching Platform

2025

<https://github.com/Kipngetich222/4thProject>

- A communication and resource-sharing platform for teachers and parents.
- Features include messaging, progress tracking, and lesson plans.

Intelligent Infant Care System

2024

<https://github.com/Kipngetich222/Intelligent-Infant-monitoring>

- A smart monitoring system using simulated sensors and mobile alerts for infant safety and health tracking.
- Built with Python, and a Javascript(chart.js) dashboard.

Bank App Application

2024

https://github.com/Kipngetich222/Bank_app

- A mock mobile banking app with features like transfers, balance checks, and transaction history.
- Developed using Java RMI, and MySQL.

Search Engine Filter App

2023

<https://github.com/Kipngetich222/searchengine>

- A web app that filters items based on character input.

Volunteering

Young Scientist Kenya (YSK) with

2023 – 2025

Raspberry Pi Foundation

Hema High - Chitago, Kisii County

Learning Facilitator – Volunteer

<https://ysk.co.ke/>

- Taught **programming fundamentals** using **Scratch and Python**, emphasizing logic, algorithms, and problem-solving skills.
- Guided students in developing small applications and interactive projects, reinforcing **computational thinking** and clean coding practices.
- Debugged student code and provided technical guidance, strengthening analytical and troubleshooting skills.
- Collaborated with other facilitators to design structured lesson plans and hands-on coding activities.
